

Delivering excellence in glass for over 135 years

N&C Glass, part of the Nicholls and Clarke Group of Companies have been supplying quality products to the glass industry for over a century.

Quality Manufacturing

With a significant investment into state of the art manufacturing facilities and an expansion in the distribution fleet, we are one of the UK's largest Independent supplier of glass and glazing products. Coupled with the ability to provide a comprehensive range of glass, from everyday stock to high performance, specialised sealed units, we provide an unrivalled level of quality products and service.

Environmental Sustainability

Corporate social responsibility is a fundamental and integral part of the company strategy and is at the forefront of our operations, having over 135 years experience of creating policies.

The drive to enhance our green credentials has led us to achieving ISO 14001 Environmental Standard by developing our existing procedures and creating new environmental systems as part of the N&C sustainability agenda, in order to proactively manage our carbon footprint.

With a clear view of the company's direction and commitment, we have taken the vital steps to ensure compliance to UK and European Standards and legislation in order to develop in a way that meets the market needs of today without jeopardising the interests of future generations within all areas of operations.

Distributing Excellence across the Nation

The distribution network is supported with our private fleet of over 30 commercial vehicles. This gives us full logistical control from the point of manufacture right through to delivery to site. As part of a continuous investment programme including machinery from Lisec, Bystronic and Cooltemper, N&C are today a major supplier of Sealed Units throughout the UK with a enviable reputation throughout the industry for quality and service.

As a business we aim to continually improve our performance and have numerous internal measuring systems to confirm we meet high standards. All parts of the business are focused on improving quality of service, which include measuring systems for performance such as ISO 9001 accreditation and kitemark to EN1279.

Eco-lite™ Sealed Units

N&C Glass are a significant manufacturer and supplier of sealed units in the UK. We are able to meet the demands of both the domestic and commercial marketplace through the supply of quality products supported by modern equipment and an experienced workforce.
